

SUSTAINABILITY AND ESG: NOW AND FUTURE

28 November 2024 | 9.30 am - 5.30 pm
Venue: Level 2, Le Quadri Kuala Lumpur

LIMITED TO 25 PAX ONLY
REGISTRATION DEADLINE:
22 NOVEMBER 2024

Overview

The main purpose of the training is to change, and to cause one's understanding and level of acceptance to be better and higher on the causes of SDG and ESG.

The United Nations is soldiering with goals and targets to prevent worsening of the environmental front and improving on the social and governance aspects in every nation. Its objectives are cascaded down to the countries to set their corresponding targets on their institutions and industries.

For effective learning and changing, participants will be impressed on how the causes of ESG started, why ESG is important to our country and why industries and companies in the country should start their ESG Journey.

Your trainer

Leong Sat Sing

Vice President,
Group Sustainability Office
